Security Analysis Group

25 July 1979

The Leak Task Force of the Security Analysis Group has been investigating the unauthorized disclosure of the OPA memorandum, "Cuban Support for Latin American Guerrillas." Recently, a suspect has been identified who previously was affiliated with the Agency. His identity has been passed to the FBI investigating team. (S)

Additionally, analyses by the Task Force has identified at least 30 classified reports that have been used as source material by a nationally known syndicated columnist. This discovery has prompted the Office of General Counsel to seek redress in an imaginative and innovative manner. The DCI, at the Office of General Counsel's behest, has requested the Department of Justice to file a civil suit that seeks only to recover the documents. (U)

The Office of Security recently forwarded to Senator Moynihan two compendia on SALT related leaks. The Senator is concerned about the number and severity of leaks surrounding the SALT II hearings. (C)
